## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-23 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hermann et al. (U.S. 5,527,326) in view of Bates et al. (U.S. 6,468,291).

Note in figures 5-8 and 12-14 of patent to Hermann et al., a first and second strut (14,28) having loop regions (22,34); wherein the first and second struts (14,28) are attached to the shaft (16) or the distal end of the first strut (14) is inherently capable of being slidably disposed along the shaft (16); wherein the Hermann et al device is capable of having a third strut mounted thereon; and furthermore, wherein the first and second loop regions (22,24) overlap with one another about the shaft (16) (see fig. 8) .

Alternative, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the Hermann et al device distal end of the first strut (14) slidably disposed on the shaft (16) and includes a third strut mounted on the shaft (16) as taught by Bates et al. so that the shaft is free to rotate or translate while the struts remain stationary and to further provide adequate expansion and control of the loop.

Art Unit: 3734

**Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Palmer (U.S. 6,638,294) discloses a capture device.
